

The "Model J" is a custom made garage door created for Jay Andre, of Jay Andre Construction. The custom nature of this door is a great example of the benefits of doing business with Garage Doors, Incorporated.

Jay's client wanted to duplicate a geometric design he saw from a fairway at Pasatiempo Golf Course, in Santa Cruz. We were able to locate and photograph the design. We then went about creating a garage door that would integrate the design, fit the opening, and assure door function.

We take pride in our ability to create well functioning works of art that complement beautiful home architecture. We enjoy working with those who design and build beauty and quality. We hope we are given the opportunity to participate in your next project!

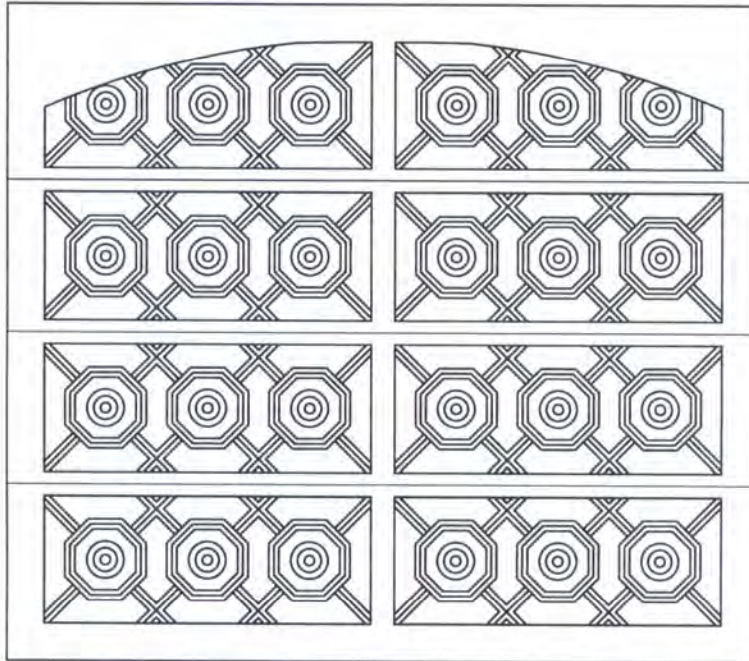

This insert shows the intricate octagonal detail done in Mahogany. This design and many others are done regularly by our craftsmen. Please stop by and see us in action. We are the only West Coast manufacturer-direct provider of custom garage door systems.

Here is a sample of the CAD (Computer Aided Design) approval process used at Garage Doors, Incorporated. Plan on receiving similar drawings for approval as your job progresses. Please note that the CAD drawing can be approved as is, approved with changes or be redrawn. These drawings are produced at the onset of each project.
